

REVLOCK

REVOLVING SECURITY DOOR

AS **AUTOMATIC**
SYSTEMS

Access controlled...
Future secured

Automatic Systems' RevLock offers the most effective flow management solution for physical and electronic security of automated entrance control.

SECURITY & SAFETY

- Three or four sectional full-height revolver
- Presence and intrusion detection (anti-tailgating)
- Single presence detection by 3D stereo camera (T models) or weight system sensor
- User safety ensured by additional systems (motor torque management, back-up battery, safety edges ...)

AESTHETICS & CUSTOMIZATION

- Light, modern structure featuring a large, glass surface
- Elegant, thin canopy for integration into virtually any building, while ensuring passage height in excess of 90" (2300 mm)
- Indoor or façade installation
- Doors are mounted directly onto existing floor

ADAPTABILITY & FLEXIBILITY

- Electronic and mechanical parts located in the canopy, easily accessible for maintenance
- Wide range of options and accessories available

RELIABILITY & PERFORMANCE

- Automated high-flow pedestrian access control
- Control panel for set up and manual control
- Remote management using TCP/IP connectivity (optional with RS485 LAN)
